Dejavoo Value Systems

MMSX® DOWNLOAD SYSTEM LEVERAGES THE WEB, E MAIL SYSTEMS AND USB STICKS

Dejavoo's web based download system and Dejavoo's Value Added Server technology are linked and enabled in a single profile set-up for the merchants. No additional systems are required. Just a Web Browser! Our VAS features are a "la Carte", choose and use.

DEJAVOO MERCHANT PORTAL & MANAGED SERVICES, GENERATES REVENUE & IMPROVES RETENTION

CALL ME - Your merchant's Dejavoo terminal sends an email Call Back request to the support desk of your choice with a snapshot of the terminal's current status.

AUTOLOAD - Automatic downloads to update your merchant's Dejavoo terminal software.

SUPPLY ORDERING - Merchants send supply orders directly to you from their Dejavoo terminal!

MERCHANT PORTAL - You and your merchants can log in and view their Dejavoo terminal's batch data, transaction data, signature uploads, Loyalty Data and so much more!

BATCH SUMMARY NOTIFICATION - Your merchants receive notification to their smart phone or PDA device that their batch has settled with batch summary information.

We Connect you to your merchant, improve your merchant's experience and satisfaction, generate new revenues and its all done via simple web services, easy to configure, program and deliver.

Dejavoo Value Added Services is a Simple Equation:

MERCHANTS STAY CONNECTED + MERCHANTS STAY INFORMED = MERCHANTS JUST STAY!

Dejavoo's Licensed Value Added Services (VAS) keeps you connected with your merchants. Two way communication, TO and FROM Dejavoo terminals, gives ISO's a unique and unprecedented opportunity to offer new and innovative services to your merchants, in real time and continuously!

- Risk Notification
- SMS Messaging
- Payroll Integration
- C/S Call Back Request
- Last 5 Bank Deposits
- Supply Ordering
- Chargeback Notification
- Cash Advance Reports
- Dynamic Menus
- Automatic Software Updates

MANY MORE VAS FEATURES AVAILABLE AND ADDED DAILY!

How Do We Differentiate From Other Terminals?

- Two way communication to and from your merchants
- Risk Notification of suspicious transactions prior to Settlement
- CALL ME feature, your merchants request a call back to the support desk of your choice with the touch of one button.
- Customize your Menu with "Favorites" to access functions with a "speed dial"
- Coverage Low? Phone Lines Down? Store and Forward keeps the sales coming in
- Built in User Manual to reduce service calls with terminal Help on the display with a single button press
- Track customer loyalty with the built in "Card Free" Rewards program
- A Single user interface on all Dejavoo Terminals makes support a breeze
- Create and save customized reports
- Added Value Programs such as Dejavoo Donation, Fee Mitigation Program, Built In Loyalty, Merchant Portal, Signature Capture, Mobile Wallet, Real Time Meal, and many more!

The Dejavoo **V9S** Wireless GPRS solution empowers your merchant with the features and tools to manage and increase business on the go! Designed for durability, mobility, and longevity the V9S technology consumes less power and can initialize into active mode in quickly. Batteries fully charge in 90 minutes and last for over 300 transactions!

The **V9S** with its Docking Base provides merchants with CHOICES! Up to three communication options – GPRS, dial and IP all available in one very savvy payment device, perfect for mobile and store-front needs! As an added benefit, one base can support multiple handsets, perfect for pay at the table solutions and stadium venues!

V8SPLUS
